

... My Take on Suicide ...  
... By: Scott A. Barry ...  
... DOI Number : 10.5150/9536 ...

I believe all adults have free will , Europe allows it , So why not America ...  
The state cannot claim anything you impose ... Police mock dead whites ...

We need to get rid of dogma not everybody believes in eternal life after  
Death , We have so many Religions even Atheism and Agnostics ... Others  
believe you are a ghost , then after that 10 other beings I can't name ...

There's no law preventing Suicide , (almost killed by Police) ...

Suicide is considered regrettable , but should be legal in the USA and  
Europe ... I almost had my brains bashed during my Mental Evaluation ...

Europe already has assisted suicide , So why not America ...

It's just one less person in the world and if you're that unhappy with your life  
that you feel like ending it , then maybe you should do it ...

Is God even real , Is the Bible or Talmud even real , are Heaven and Hell real  
places , Not everyone says so ... You have free will as a Targeted Individual ...  
There are so many theories on life after death that are not even on the Internet  
or Peer2Peer Dark Web so probably you're just this like Telepathic Ghost that  
can remote view anything , not claiming that at all , just giving an example , so  
maybe if you're unhappy with say Paypal networking with ADL , you have the  
absolute free will to end your life and eliminate any financial stress you have ...

Nobody really absolutely knows what goes on after death anyways there's  
always that dumb Psychic Telepathic Ghost Theory and if people believe it let  
them choose for themselves over some retarded state claim not to suicide ...

When it comes to narcissists and handlers you have the absolute free will as an  
adult to divorce from them and or end your life right in front of them ... Screw  
them anyways , those narcissists ... They're gonna do it anyway , the fact that  
there is a law against it is just retarded , they idea of a state claiming so is

illogical and retarded , there is no social contract in that sense ...

We are the least developed country in the USA , Europe already has cleaner tap  
water that they add Ozone to , The ESA already had comet landings with good  
math , we are just a stagnant country in the Corporate Cestui Que Vie 1871  
United States of America founded by King James who re-wrote our Bibles to the  
King James Bible ... A person has the right to maintain their life and stay alive ,  
so why does a person still not have the right to not end their life over some  
religious dogma over eternal punishment in hell , I am an Atheist and I do not  
believe in any of that crap period ... The other spiritual others can seek is

Science that has not been politicized by leftists Liberal Woke Retards , I am non-  
partisan in the stance that I hold the same views as a Free Will Type not  
affiliated with any political party , because we surely know Zionists Control all  
the Press including this Internet I use , so in that sense there is no law in practice  
that could stop or prevent the choice of suicide , in fact modern suicide restraints  
have been known to kill people , and I have also heard of Police Killing Patients.

White men are killed everyday during mental evaluations from Restraints ...
